

Ear Disease Diagnosis Report

Inference Mode: EfficientNet-B0

Condition: Otitis Externa

Top-3 Predictions:

- otitisexterna: 91.38%
- aom: 7.41%
- csom: 1.10%

Description:

An infection of the outer ear canal, often called 'swimmers ear', caused by bacteria or fungi. Symptoms include itching, pain, and swelling.

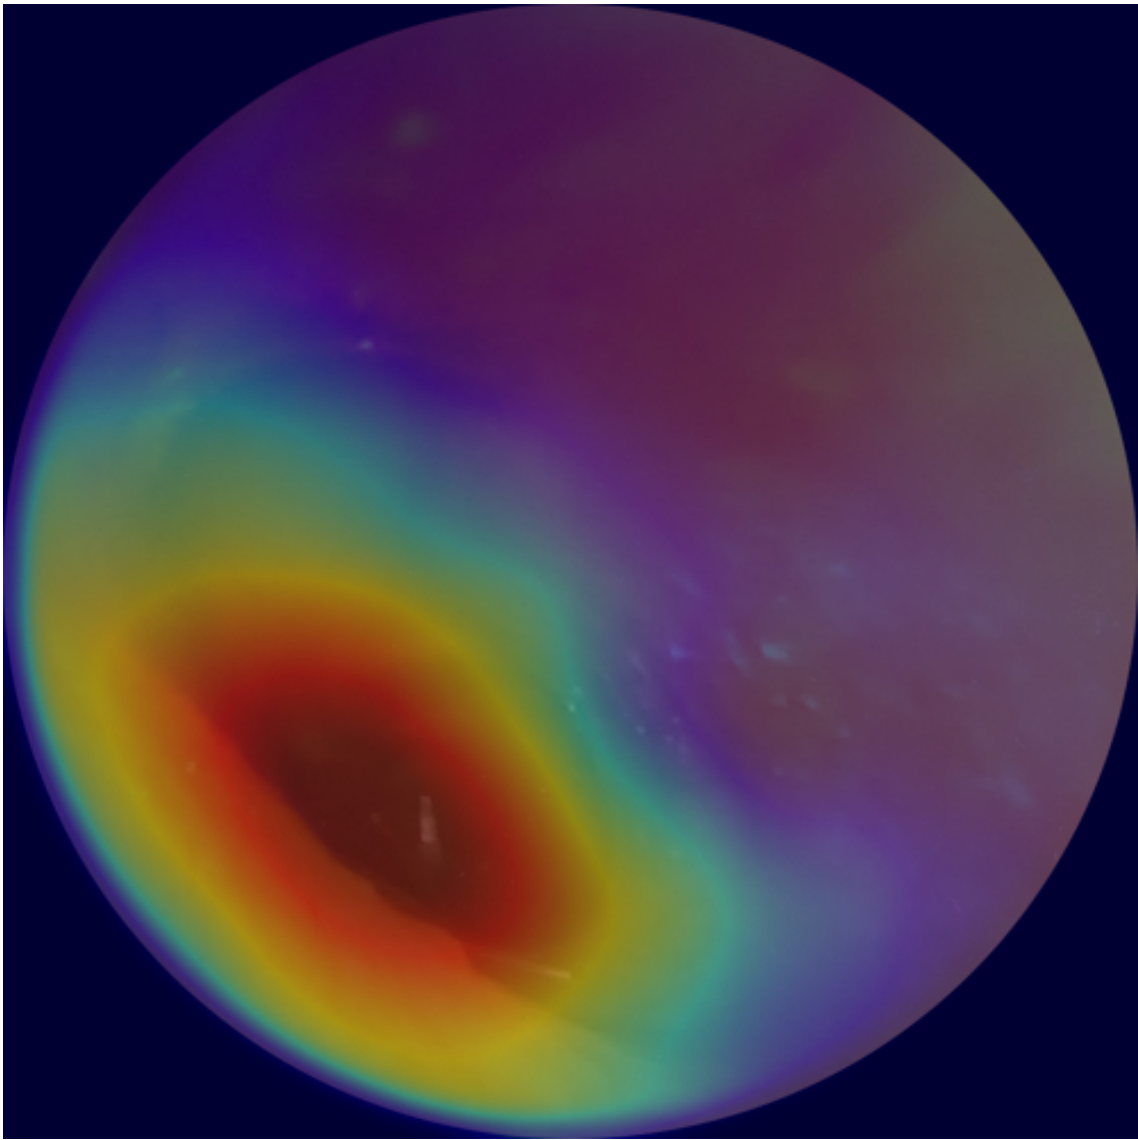

Precautions:

Keep the ear dry. Avoid swimming until healed. Do not insert objects into the ear canal.

Medications:

Antibiotic or antifungal ear drops (e.g., ciprofloxacin-hydrocortisone). Pain relief as needed.
